Sharing Solutions

Don’t Miss an Opportunity While You’re Looking for 4-Leaf Clovers!

Arkansas State Dental Association
130th Annual Scientific Session
March 17-18, 2017
Marriott Hotel Little Rock
Little Rock, Arkansas
Greetings from ASDA!

We hope you will plan to join us for “Sharing Solutions” on March 17-18! You have noticed that the 2017 meeting is earlier than normal. The entire event will occur at the Marriott Hotel in Little Rock in a compact, easy-to-access venue. And who better to help us launch a new meeting format than Dr. Hal Crossley, who will bring his vast knowledge of pharmaceuticals to help us maximize patient care. Also, our own Dr. Hassan Bashiri will discuss head & neck reconstruction for cancer patients as well as craniofacial anomalies. Plus, CE chairman Dr. Jordan Cooper has planned great St. Patrick’s Day party on Friday night at Prost, next to Willy D’s! Dr. Steve Kilpatrick will offer a Nitrous Oxide course on Saturday morning. ASDA is very pleased again to partner with the Arkansas Dental Hygienists’ Association (ADHA) to host concurrent sessions this year. We’ll see you there.

Dr. Chuck Wood, ASDA President

Party at Prost! (next to Willy D’s)

St. Patrick’s Day Party!

All conference attendees are invited to celebrate St. Patrick’s Day with drinks and dancing at PROST (next to Willy D’s) in the Rivermarket!

Course Synopses

Avoid Liability: 
Know Your Patients’ Medications and Their Impact on Dental Treatment

Presenter: Dr. Hal Crossley 
Friday, March 17 
8:30AM - 4:30PM 
7 CDE Hours 

Should I use caution when prescribing NSAIDs with antihypertensives? Can NSAIDs cause atrial fibrillation? Can I prescribe an NSAID in a patient who takes warfarin? Can I prescribe fluconazole (Diflucan) for a patient taking clopidogrel (Plavix)? There are hundreds of drug interactions but only a handful is clinically relevant. Is antibiotic prophylaxis required for patients with orthopedic prostheses? Your patients are living longer thanks to their medications but many of the physician-prescribed medications used by your patients have dental implications and side effects affecting your treatment plan. Some medications are more likely to cause violent behavior and others can cause a “burning mouth syndrome”. What analgesic is the safest for a pregnant patient? 

This presentation includes the indications, contraindications, and side effects of the most commonly prescribed medications. Many of these medications were not approved when you took your pharmacology course in dental school. These medications represent one-third of all prescriptions taken by your dental patients. Familiarity with these drugs will provide the dental practitioner with a better appreciation for the health profile of your dental patient.

At the conclusion of this course, the attendees will know: 
• Medications that could adversely interact with dental drugs. 
• Why your patient is taking their medications. 
• What oral side effects may be caused by these medications. 
• Maximum doses for commonly prescribed pain medications. 
• When not to prescribe NSAIDs. 
• How to combine analgesics to maximize their effects. 
• Current recommendations for SBE and orthopedic prosthesis prophylaxis

This presentation is useful for the entire dental team.

Maxillofacial Reconstruction and Rehabilitation in Cleft Lip, Palate and Craniofacial Anomalies and Head and Neck Cancer Patients

Presenter: Dr. Hassan Bashiri 
Saturday, March 18 
8:00AM - 12:00PM 
4 CDE Hours 

In this presentation, Dr. Bashiri will discuss dental considerations on treatment of radiation and chemotherapy patients before, during and after therapy. This will include making fluoride carriers, prophies, restorations and extractions.

For cleft lip and palate patients, Dr. Bashiri will discuss different prostheses, including feeding appliances, orthopedic appliances, protection prostheses, overdentures, speech aids and crown & bridge treatments.

In his presentation on head & neck cancer patients, he will discuss mandibulLECTomy patients as well as surgical and prosthetic reconstruction, including flange prosthetics and total mandibular replacement. He will also present methods by which maxillectomy patients can receive surgical obturators, intermediate obturators and permanent obturators.

In his discussion on facial prostheses, he will discuss orbital prosthetics, ocular prosthetics, nose and ear prostheses and a combination intraoral/extraoral prosthesis.
Course Synopses

Minimizing Barriers to Dental Sleep Implementation
sponsored by HENRY SCHEIN®

Presenters: Ryan Javanbakht and Randy Curran
Friday, March 17
9:00AM - 3:00PM (Course limit: 15)
5 CDE Hours

Randy Curran is the founder of Pristine Medical Billing. He has more than 10 years of experience billing in the sleep medicine space. His drive and rigor to help save lives has allowed him to improve sleep medicine protocols and experiences in hundreds of practices across the U.S.

Ryan Javanbakht is co-founder and VP of Sales of SleepTest.com, a national home sleep test service that allows patients to be tested in the comfort of their own beds, and equips clinicians with a trusted source for obstructive sleep apnea diagnostics. He and his team formulated an excellent sleep testing model.

Nitrous Oxide Course
($40 course - preregistration only)
Presenter: Dr. Steve Kilpatrick
Saturday, March 18
8:00AM - 12:00PM

Dr. Steve Kilpatrick will offer his popular Nitrous Oxide course on Saturday, March 18 at 8:00AM in the Ouachita Room of the Marriott Hotel. According to Article XIII, assistants who monitor minimal sedation patients must have a nitrous permit.

Clinicians

Harold L. Crossley, D.D.S., M.S., Ph.D. is Professor Emeritus at the University of Maryland Dental School. A native of Rhode Island, Dr. Crossley received a BS in Pharmacy from the University of Rhode Island in 1964. He later was awarded the MS (1970) and Ph.D degrees (1972) in Pharmacology. The University of Maryland Dental School in Baltimore awarded Dr. Crossley the D.D.S. degree in 1980. The liaison between the classroom and his part-time dental practice produced a practical approach to understanding the pharmacology of drugs used in the dental office.

Dr. Crossley has co-authored a number of articles and four books dealing with a variety of topics within the field of pharmacology. Other areas of expertise include the pharmacology of street drugs and chemical dependency. He was the recipient of the 2008 Gordon Christensen Lecturer Recognition award presented by the Chicago Dental Society and the recipient of the 2012 Award of Distinction presented by the Academy of Dentistry International for his efforts in Continuing Dental Education. He has been a consultant for the United States Drug Enforcement Administration and other law enforcement agencies since 1974. Drawing on this unique background, Dr. Crossley has become nationally and internationally recognized as an expert on street drugs and chemical dependency as well as the clinical pharmacology of dental drugs.

Hassan Bashiri, D.M.D., M.S. served for more than 25 years as the Director of the Maxillofacial Prosthetic Division of the Department of Otolaryngology and Maxillofacial Surgery at the University of Arkansas for Medical Sciences. As director, he was responsible for teaching and training physicians and dental hygiene students. At UAMS, he primarily treated patients with defects due to cancer, radiation, chemotherapy, craniofacial anomalies and TMJ pain syndromes. Dr. Bashiri has written and published many chapters in medical books, scientific dental and medical articles related to his work in the area of head and neck reconstruction. He has lectured at numerous dental and medical society meetings, both nationally and internationally. He earned his D.M.D. in 1974 from the University of Tehran, followed by a Certificate of Prosthodontics from the University of Illinois in 1977. He later earned a Masters of Science in Radiology in 1978 from UI and a Certificate in Maxillofacial Prosthetics in 1979 from the University of Pittsburgh.

Dr. Bashiri’s hobbies include the nay, a professional Persian flute. He has played at Carnegie Hall in New York, Versailles Palace Concert Hall in Paris, France, and Universal Amphitheater in Los Angeles. He enjoys running, motorcycling, and holds a black belt in Tai Kwon Do. He is a third place Grand National Champion, and was a close friend of the late Chief Master In Ho Lee.

New vendor for FREE patient translation services

We’ve all been there. A new patient comes to the office and does not speak English. A language barrier makes providing the needed care most difficult. The free phone interpretation service Delta Dental offers our network providers has changed from Language Line to a new company—Voiance.

To access Voiance phone interpretation services, follow these simple steps:

1. Call Voiance at 844-648-5669.
2. When prompted to enter your PIN, enter your Arkansas dental license number.
3. Say the language you need.
4. When the interpreter comes on the line, give a brief explanation of the call.

As a Delta Dental provider, you also have access to the Voiance Interpreter app, where you can connect to interpreters through any mobile device. Turn your tablet or smartphone into a mobile interpreter—perfect for use anywhere in your office!

Ask your Delta Dental professional relations representative for more details on Voiance!
