Dentistry's Role in Combating Human Trafficking and Domestic Violence

6.0 CDE Hours

This course will introduce the dental team to the scourge of human trafficking and domestic violence which occurs daily in the United States. This program will include information from the Department of Homeland Security and ICE. We will cover how you can recognize these victims in your community and the scope of the problem. Dentistry is involved in two ways, DHS/ICE often needs scientific means to determine the age of certain victims, and third molar/hand wrist films are often used to accomplish that task. It is also conceivable that a victim of human trafficking will sustain dental trauma and may need cosmetic dental restoration.

After this course you will be able to:
Understand the scope and recognize the victims of human trafficking and domestic violence.
Understand Dentistry's role in reporting these cases.
